at Miramar Golf Club, Wellington: xxx

Now CFOs, controllers and corporate accountants can learn how to adopt winning finance team better practices – and become more effective, creating a positive footprint in every organization they are part of. Why spend months on an annual planning process you know is flawed? Why spend precious time on an annual report recasting numbers that were available the first week of the new year? Why spend a week or two on the monthly finance report that may not be read? Author and performance management leader David Parmenter has collected practices from more than 4,000 corporate accountants, all sectors from around the world. He has written an A-to-Z guide on what makes a 'winning finance team'.

His book, "Winning CFOs" which will be the back bone to this course is filled with templates, questionnaires, workshop agendas, draft memos and checklists to get the implementation started and take your Finance team on the journey from good to great.

The general consensus was that this was one of the most worthwhile professional development seminars that any of us had attended in quite a while. Your passion for all of the subjects covered came across throughout the day, and was backed up by the substance of your subject matter expertise and practical experience. The friendly, interactive nature of the seminar was a big plus.
